

# COMBAT THE NEW NORMAL

WITH SOLDAGUARD AND SOLDAMIST

*PEACE OF MIND IN UNCERTAIN TIMES*

## PRODUCT BENEFITS:

- Key active ingredient (BCK) EPA certified
- All natural, oil based ingredients
- non-toxic / non-caustic
- Eliminates 99.9% of bacteria, mold, Mildew and fungus on contact with lasting results (>30 days)
- Safe on all surfaces, including electronics
- Quick & easy application process
- Nanotechnology with dry application
- Improves air quality
- Eliminates odors (including smoke) at a molecular level
- Aromatic, soothing fragrance

## COMPANY HIGHLIGHTS:

- Disabled Veteran Owned & Operated Company
- Independent Laboratory Studies of Effectiveness (Kill Rate)
- EPA & FDA Registered Manufacturing Facility
- Soldaguard FDA Approved Medical Device
- Military Grade Manufacturing
- CDC Registered Nurse on Staff

Part No: DN-007

SoldaMist Product  
Part No: DN-420

## WHY CHOOSE SOLDAGUARD

The need to safely and cost effectively treat air/heat duct systems is imperative and needs to be quickly addressed. Most people fall ill due to airborne diseases and viruses without their knowledge. We take for granted the air we breathe in the environments we spend long periods of time such as our workplace, our bedrooms and our vehicles. Most products available to the consumer are only 'spray and wipe' surface applications. These may be easy to apply yet they are only effective superficially and cannot cover hard-to-reach areas and do not provide long term protection. Moreover, if the cloth, sponge or applicator used is not sterile, this will only spread bacteria further.

Thus, on a microscopic level, where the majority of the germs and bacteria hide and multiply, there was nothing available that was safe, low cost, easy to apply and highly effective. Hence, SoldaGuard is proud to introduce SoldaMist, a nanotechnology treatment that can be performed quickly and hassle-free to effectively exterminate bacteria in all areas of your home, automobile or places of business through the use your ventilation system. The uniquely designed fumigation device can atomize the proprietary anti-bacterial solution into ultra-fine mist containing millions of "nano scale" sized cleaning particles that can be easily absorbed into most surfaces, including cushion seats, pillows, beds, ceilings, curtains, carpet, clothing and electronics. The ultra-fine mist will penetrate virtually all areas where bacteria resides and eliminates 99.9% upon contact.

## WHO CAN BENEFIT?

AUTOMOTIVE,  
TRANSPORTATION

SCHOOLS

HOMES

RESTAURANTS

SHOPPING  
CENTERS

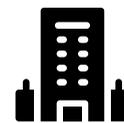

FITNESS  
CENTERS

MUNICIPALITIES

CAR DEALERS/  
CAR WASHES

OFFICE  
BUILDINGS

CHURCHES,  
MOSQUES,  
SYNAGOGUES

HOTELS,  
MOTELS
